Coddlelife Laboratory Grade Borosilicate Glass Bottle and Polypropylene Bottle Featuring Latest Venting Technology Are Listed on The Green Parents' List

South Pasadena, CA – Coddlelife new line of products including Laboratory Grade Borosilicate Glass Bottle and Polypropylene Bottle Featuring Latest Venting Technology are listed on the Green Parents' List. Coddle Inc. always strives to produce high quality, non-toxic baby feeding products, and has invested a great amount of time and effort to meet the highest safety standards. “Receiving the green check mark from the Green Parents' List is very encouraging to our company and brings credibility that our products are safe for both parents and child”, says Coddle Inc.

About Green Parents' List

Green Parents' List works with companies to provide independent verification that a product has met restricted substance requirements. Formed by parents with engineering and scientific backgrounds, Green Parents' List has the technical background to verify the manufacturer's claims. The Green Parents' List Check Mark is awarded to companies whose products have been checked against the material restriction requirements mandated by the U.S. Consumer Protection Safety Improvement Act (CPSIA).
